

Exploring the Earth Curriculum

Nursery Settling in

14.09.20/21.09.20/28.09.20

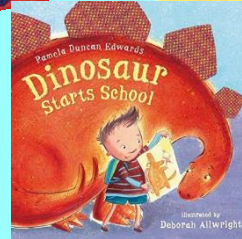

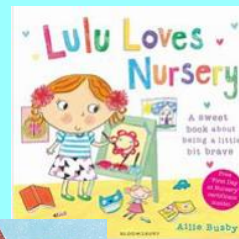

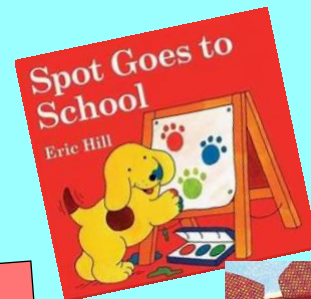

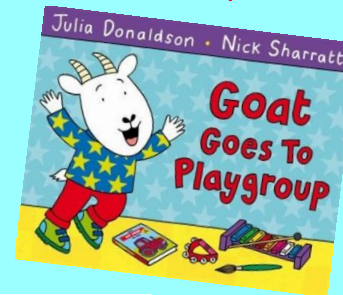

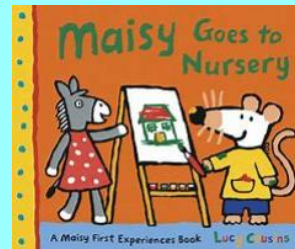

We will be getting to know our teachers and making new friends. We will explore lots of activities in the classroom:

Painting, playdough, cutting and sticking, programs on the computer, threading, sand and water.

We will be exploring our Nursery Garden.

We will be learning our class routines such as where to hang our coats, tidying up, where the toilets are and where our group sits.

We will be learning to say goodbye to our parents and carers and telling them about the fun we had at Nursery when they pick us up.

We will be talking about our favourite things to play.

We will be singing rhymes and songs, making models with construction and exploring numbers and shapes.
